

FIRMWARE UPDATE INSTRUCTION + UPDATE HISTORY

*To assure the best possible performance of your equipment we carry out regular software updates to correct possible errors and/or adding new features. Therefore we advise you to always install the latest updates. **READ THE INTRUCTIONS + UPDATE HISTORY CAREFULLY!***

LED PLANO 6in1

The attached "GSD-file" should be programmed using the special "FIRMWARE UPDATER2+" unit from our Briteq® brand. (order code: B05019)

Update instructions are included with the firmware updater.

UPDATE HISTORY

V1.02 (2017-05-16)

Original firmware as used in batch1.

V1.04 (2017-11-28)

We advise to install this update as it brings solutions for some known issues.

- **FIXED:** This firmware solves a DMX problem when the projector is used in a wireless/wired environment. (DMX signal comes in through M-DMX USB port and transferred via wired DMX output connector)

V1.05 (2019-03-19)

We advise to install this update as it brings solutions for some known issues.

- **FIXED:** Improved protection against signal interferences to solve the issue where in some rare cases the DMX-address was lost.

V1.06 (2021-10-14)

IMPORTANT: This is **update is NOT NEEDED** if your machine currently runs on V1.05 firmware! This is an update to make sure that two different processor brands can be used during manufacturing, to overcome the current global shortage of electronic components.
